## Introduction WGA Online Courses in Glaucoma

---

Dear reader,

Welcome to the Online Courses in Glaucoma of the World Glaucoma Association. We currently offer two courses, in various languages. The Basic Course in Glaucoma consists of 4 modules that address basic aspects of glaucoma diagnosis: Intraocular Pressure, Gonioscopy, Standard Automated Perimetry and Clinical Examination of the Optic Nerve. The Continued Education in Glaucoma Modules consists of 4 modules that address advanced aspects of glaucoma diagnosis: Ocular Hypertension, OCT in Glaucoma, Tips to maximize adherence and How to approach the failed bleb.

These modules were written by world renowned experts in the field and reviewed by members of the WGA Education Committee. They are intended for ophthalmologists and other eye-care providers. All texts, pictures and videos were adapted to an online platform by a team of e-learning experts. This will allow you to have a pleasant learning experience.

At the end of each module there is a multiple-choice test that will autocorrect once the exam is completed. We hope that you enjoy the courses and gain new knowledge to improve your diagnosis skills.

S. Fabian Lerner, MD  
*Chair, Education Committee*
